

Under-tile heating...
toasty, comfortable
and very affordable.

warm as

HOTWIRE
UNDER-TILE HEATING

HotWire under-tile heating may well be the very ultimate in home heating – the most comfortable and efficient on-demand heating system available for your home.

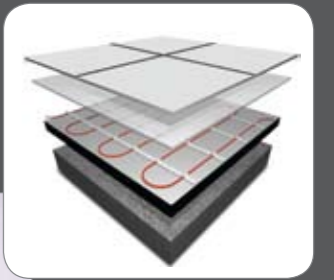

HotWire is fast to heat up and is surprisingly economical to install and run. As HotWire radiates warmth from the entire floor area, the comfort is evenly spread and thoroughly luxurious.

Easily installed, right where the heat's wanted.

HotWire heating elements are installed directly underneath the tile, efficiently warming the entire surface of the floor. The elements can be installed under most types of floor surfaces, including ceramic tiles, marble, granite and slate.

Installation can be easily performed by HotWire-accredited installers, who will help achieve a professional, customised result for your home heating needs. (In some States, part installation can be done by a competent home handy-person.)

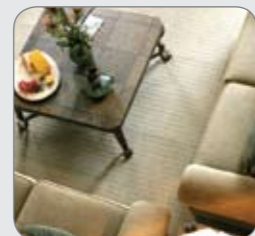

“Warm as toast” for less dough than you’d think.

Heating for a room, an open living space, an entire house.

Heat a room, a living area or your whole home. It’s all under your control at the touch of a button.

HotWire provides beautiful, cosy, even heat for all parts of the home and is especially suitable for wet areas. It’s warmth is automatically controlled by a sophisticated, easy to use thermostat which ensures the heat is on when and where you want it.

A truly automated heating system to suit your lifestyle.

Better bathroom design...

Using under-tile heating enables superior bathroom design. With the floor warming the entire room, the exhaust-heating unit doesn't need to be in the centre of the ceiling, and the exhaust fan can be located directly over the shower alcove where it will work best.

Evenly distributed warmth, better steam removal and no mould build-up adds up to an altogether better bathroom.

no foggy mirrors!
