

Floor Heating and Heated Towel Rails

PRODUCT CATALOGUE

"We used Hotwire in our first season on The Block and in various projects since. Hotwire is a great product, easy to install and excellent value for money. Hotwire offers brilliant backup and support and we are very happy to recommend them."

-Kyal and Kara

Nothing left to do but simply relax

Touch Screen Thermostat

Every Hotwire Heating System comes with a fully programmable touch screen thermostat. Simply program it around your lifestyle for luxurious heating whenever you require it.

Fully programmable
Floor or air sensing

Multiple daily functions
Touch Screen

So easy to set

Control your settings with the convenience of the Hotwire mobile app

We also offer a WiFi thermostat. You can control all the settings on your Hotwire system with the convenience of a mobile app.

Programmable Timer for Heated Towel Rails

The Hotwire Programmable Timer allows you to turn your towel rail On and Off and also select 2 or 4 hours of operation. Simply turn it on when you get up in the morning and your towel will be lovely and warm when you need it. Return your towel to the rail and it will be dry before you know it.

Affordable luxurious warmth for your loved ones

Hotwire Floor Heating may well be the very ultimate in home heating.

Floor heating radiates warmth from the ground up, heating not just your feet but your entire home. Hotwire is luxury you can afford. An average bathroom system is yours for approximately \$800 RRP and a living room for only \$2500 RRP*. As the heat is evenly spread throughout every room, it's just like standing outside in the first few days of Spring; beautifully warm and thoroughly luxurious.

*Based on a 4m² bathroom and 40m² living room.
(Excluding installation)

 **Hotwire**
warm your soul

Heating for a room, an open living space, or an entire house

Under Tile Heating

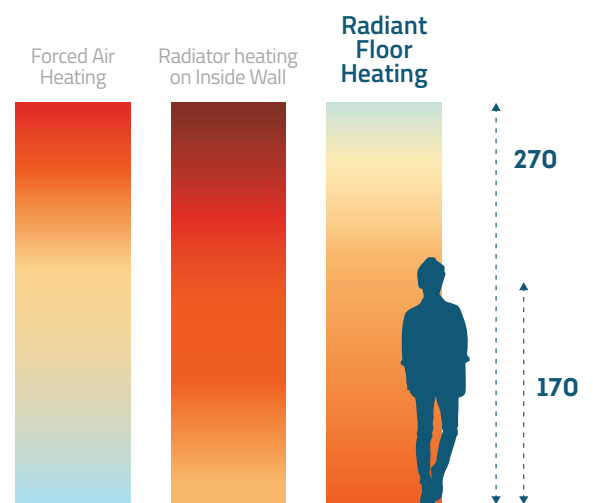

Under Tile Heating is perfect for the Australian climate. The 4mm thick element is placed directly on top of the sub floor and the flooring simply laid over the top. As the element is so close to the floor surface your home will be warm in 30-60 minutes.* The fully programmable touch screen thermostat can program your floor heating to switch on when you require it, so when you arrive home or get up in the morning your home is luxuriously warm and waiting for you.

Under Tile Heating is ideal if you are renovating as only the floor surface needs to be replaced to facilitate installation. You can cover an area as small as 1m² through to the biggest living areas. With running costs as low as 2c per m² per hour it sells itself.

Hotwire is perfect for a bathroom as the heating will not only heat the floor but also dry the floor meaning less mould and therefore less cleaning.

*Home insulation and some environmental factors can affect the heat up time of floor heating systems.

Temperature Profiles for Various Methods of Heating

Other styles of Floor Heating from Hotwire

In Screed Heating

In Screed Heating is ideal if you are installing a sand and cement screed over a floor surface or planning a polished concrete floor. Whether you are building a new bathroom or an extended living area In Screed Heating is a perfect solution.

The element sits approximately 30mm deep in the screed and spreads an even warmth throughout the entire room. It does take a little longer to heat than Under Tile Heating (up to 2 hours) but may be the ideal solution for your project.

Heating Mat

Heating Mats are available in Under Tile Heating and In Screed Heating.

Hotwire Heating mats have the added bonus of the heating element being already fixed to a self adhesive fibreglass mesh. This makes installation a breeze as you simply roll out the system across your floor.

As with all Hotwire products the fully programmable thermostat is standard. You just need to choose which colour you want!

Forced Air Heating

More efficient heating for your home

Running costs of Hotwire vs Heat Lamp

*The comparisons are based on a 4 bulb Heat Lamp unit at 375 watts per bulb. Hotwire costs based on a 600 watt element heating at full capacity for 1 hour and then cycling at 50% capacity for the next 2 hours. Running cost of \$0.26 per/unit is an estimate only and will vary due to site conditions.

Get the clean, hygienic
flooring you've always
wanted without
sacrificing warmth

Nothing beats that feeling of warmth

Imagine stepping out of your shower on a cold winters morning and being greeted by a toasty warm towel to wrap yourself in. A beautiful touch of luxury to wipe away those winter chills, at a price you can afford.

Heated towel rails to suit any bathroom

FLAT SQ8 / FLAT SQ10

Flat Square

The flat square towel rail sets the standard in towel rail design. It features elegant square vertical rails and rectangular horizontal bars. It creates an excellent feature and adds luxury to your bathroom.

CURVE R8 / CURVE R10

Curved Round

The curved round towel rail is a classic and enduring popular design. Featuring round vertical rails and curved horizontal bars and adds extra elegance to your bathroom.

Actual colour may vary from printed image.

"Using Hotwire Floor Heating for the first time is like flying first class or business class for the first time. It's not a dire necessity, but damn does it feel good. Trust me, no matter where you live in Australia, you'll never go back. And the best thing? Hotwire is WAY cheaper than you think."
