

HOTWIRE INSTRUCTIONS

MODEL: HWTS1

Programmable Thermostat

**CONGRATULATIONS
ON THE PURCHASE OF
YOUR NEW HOTWIRE
THERMOSTAT.**

This guide will help you program your thermostat to get maximum value from your new floor heating system.

Scan for Video Manual

SELECT HORIZONTAL OR VERTICAL OPERATION

Press **menu**, then press "Direction" to select **Horizontal** or **Vertical**.

SET TIME AND DAY

Press **Menu**
Then press "**Time**".

Use the **up** and **down** arrows to set the correct time and day.

MANUAL / AUTO / HOLIDAY MODE

For **Manual operation** Press "**Mode**" until the "**Hand**" symbol is displayed.

Then use the **- and +** buttons either side of the temperature to increase or decrease the set temperature.

For **Auto** press "**Mode**" until this symbol is displayed.

For **Holiday** press "**Mode**" until a plane is displayed. (*Holiday duration can be set in advanced settings*)

PROGRAM YOUR FLOOR HEATING.

Press "**Menu**" then "**Edit setting**"

Your thermostat can turn on and off twice every day.

The first "**On**" time is when you want your heating to turn on each morning.

The first "**Off**" time is when you want your heating to turn off each morning.

Use the **up** and **down** arrows to set the correct time and temperature.

NOTE: The temperature at "Off" time is maintained. Set to approximately 16°C to prevent cold floors, or 5°C to keep heating turned off.

Repeat for the on and off in the evening. If you don't want your heating in the evening just set the on and off times to be only 1 minute apart.

NOTE: Your heating is set to 5-1-1 (same schedule weekdays, different on weekends). For a daily schedule, go to Menu > Advanced Settings > Option 5, then change to 7.

KEY LOCK

Press "**Menu**" then select **Keylock**. To **Unlock**, repeat.

Advanced Settings

Changing some of the following settings can negatively affect your floor heating if not adjusted correctly.
If you are unsure please check with your Hotwire Installer.

TECHNICAL DATA

Voltage: 110/230V~50/60Hz

UFH Relay: Max.16A(Resistive load) Floor Heating

Floor Sensor Type: 3K 5K 6.8K 10K (default) 12K 15K 20K 22K 33K 47K 50K 100K

Temperature range:

Room Temperature: 5-60°C

Floor Temperature Limit: 5-60°C

On/Off Differential: ±0.5,1,2,3°C

Storage temperature: -10-50°C

IP Class: IP21
